MAY 16 2006

**Amendments to the Claims:**

1. (Currently Amended) A method of a server for ordering goods or services, the server being capable of communicating between a plurality of wireless communication devices and a plurality of providers of goods or services, the method comprising the steps of:

receiving a request for the goods or services from a user by way of a wireless communication device;

accessing a database having information relevant to said user and preferences related to said goods or services;

forwarding an order for the goods or services to a provider of said goods or services, said order dependent on said information;

receiving a reply regarding said order from said provider;

formulating a response concerning said order and said reply, said response formulated based on capabilities of a display of said wireless communication device; and

sending said response to said wireless communication device.

2. through 10. (Canceled)

11. (Currently Amended) The method of claim 1 wherein said step of receiving a request further includes receiving a request that is formulated based on said capabilities of said wireless communication device.

12. through 42. (Canceled)
